        Interesting Facts
        Saint Leo College expanded and became Saint Leo
        University after Angella graduated in 1999.
        Her husband was the first graduating
        class of Saint Leo University in 2000.

        When Angella took the position as Human
        Trafficking Prevention Specialist, it was a 1
        year position. She found additional funding and
        doubled the program scope within 1.5 years.

        Angella was raised in a very conservative home;
        however; she acclimated quickly to working as
        a prostitution decoy at Tampa Police Department
        and had the highest number of arrests during these
        operations.

        Angella conceived twins spontaneously. There
        is no family history of twins and she did not
        have fertility treatments. It was quite the
        shock! She didn't speak for 5 hours after
        learning that she was having twins.

<article>
  <h1>About Angella</h1>
  <p>Hi, I'm Angella! I am currently working on a Master's degree at George Mason University in Instructional Design and Technology with an additional e-Learning certificate. I became interested in this field while working in my current position as the Human Trafficking Prevention Specialist for Prince William County Public Schools. I have

many responsibilities in this position, including the role of curriculum development.

My journey to this point has been an interesting one. It is important that you understand this journey to understand where I am heading in the future.

I graduated with a Bachelor's degree in Elementary Education with a Computer Information Systems minor in 1999 from Saint Leo College (now Saint Leo University) in Florida. I became a 5th grade classroom teacher with Pasco County Public Schools in Florida. I quickly realized that although I enjoyed the art of teaching, I did not enjoy many of the additional challenges that classroom teachers face.

I was encouraged to go into law enforcement and was quickly hired by the Tampa Police Department. I loved this line of work and was accepted to the Quick Uniformed Attack on Drugs (QUAD) squad which focused on street to mid-level narcotics. I also worked with the Street Anti-Crime (SAC) squad which focused on prostitution and pattern crimes. I left this position in 2007 when my husband was hired by a federal law enforcement agency and we were relocated to New Jersey.

After we relocated, we had fraternal twin girls and I became a stay-at-home mother. We were again relocated in 2013 to Virginia. When the girls entered 1st grade, I began thinking about what to do professionally. Due to my husbands travel schedule, I cannot work in a position that requires shift work. I was recruited by Prince William County Public Schools in Virginia to work as the division Human Trafficking Prevention Specialist which blends my education and law enforcement backgrounds. Knowing that this position is grant funded, I continued to think about what I would enjoy doing long-term. I kept coming back to my original interests of blending education with technology; however, I wanted to do it in a way that did not bring me back to the public school sector. That is when I was able to find the Instructional Design and Technology program at George Mason University.

I am interested in finding a position that will allow me to explore the various creative aspects of User Experience (UX) design. This area really speaks to me. I am intrigued with the prospect of being able to make learning through technology humanistic and natural for anyone. That concept excites me!

What I have learned about myself through this journey is that I don't like to be bored! I would like to work for a company that allows me to think outside of the box to solve problems, that challenges my skills, and that gives me the space and ability to continue learning.

Short-Term Goals (1-2 years):
• Graduate from the Instructional Design and Technology program at George Mason University by December 2018.
• Find a position that will allow me to explore and develop my skills as a User Experience (UX) Designer.

Mid-Range Goals (3-5 years):
• Obtain additional certifications in App Development.
• Obtain additional certifications in Website Design and Development.
• Continue to expand my knowledge and refine my skills as a User Experience Designer.

Long-Term Goals (6+ years):
• Become an established User Experience Designer and continue to build my skills and reputation.
• Have an employer that encourages creative thinking and who values work life balance.
